Biblical Accents: Cantillation

In the synagogue the Hebrew Bible is not simply read, but chanted according to an ancient system of melodic motifs, notated in scriptural codices in the form of graphic symbols superimposed above and below the words. The art of chanting the Bible is called 'cantillation', a word derived from the Latin *cantare*, meaning 'to sing'. In the traditional Jewish liturgy, cantillation is performed by a solo singer, appropriately qualified and prepared, who chants the sacred text for the congregation according to the ancient traditional melodies, unaccompanied, in a free, speech-like rhythm.

In Hebrew, the motifs of cantillation are called טעמים *ṭeʿamim* (singular טעם *ṭaʿam*) or טעמי המקרא *ṭaʿame ha-miqra*. The word טַעַם *ṭaʿam* in classical Hebrew generally means 'taste, sense, reason', alluding to another function of cantillation: to add the inflection that clarifies the meaning of the text. The term is first used in the Talmud (Babylonian Talmud Berakhot 62a), referring to the melodies to which the biblical text is chanted. In Yiddish, the lingua franca of the Jews in Northern Europe for centuries, these motifs (and their notation) came to be known as *trop*. The derivation of this word seems to be from the Greek *tropos* or Latin *tropus*, referring to a mode or extended melody in church music of the Middle Ages. The Yiddish term for the art of cantillation is לייענען *leyenen*, a term that in other contexts means 'reading'. The equivalent Hebrew term is קורא *qore*, which also means simply 'reading'. The person designated to cantillate the Bible is called the בעל קריאה *baʿal qeriʾa* 'master of reading'. In this context, there is no lexical distinction between 'reading' and 'cantillation'. Implicit in the concept of Jewish liturgical reading has always been the assumption that the text would be cantillated, not spoken. But this is not an exclusively Jewish praxis; throughout Asia, sacred texts are cantillated in this manner. From the Moslems in the Middle East to the Hindu in India and the Buddhists in Japan, the words of sacred scripture are chanted in the simple rhythms of speech, in a performance practice resembling that of Hebrew Bible cantillation (Avenary 1972:1099–1100).

The teachers of oratory in ancient Rome made disparaging references to this Asian practice of chanting a text. Cicero, the great Roman orator of the 1st century B.C.E., wrote, "If he had begun his whining sing-song, after the manner of the Asians, who could have endured it?" (8.27:118). And about a century and half later Quintilian disparaged "the practice of chanting instead of speaking, which is the worst feature of our modern oratory" (11.3.57:275).

There is evidence that in the first centuries of the Common Era some Jews, sensitive to the criticism of their Roman neighbors, had been reading the Bible without its melody. In the late 3rd century C.E. Rabbi Yohanan felt it neces-

 ISBN 978-90-04-17642-3

sary to remind his fellow Jews that it was a requirement to chant the Torah: אמר רבי יוחנן: כל הקורא בלא נעימה…עליו הכתוב אומר: וגם אני נתתי להם חקים לא טובים *ʾamar rabbi yoḥanan: kol haq-qore be-lo neʿima…ʿalav hak-katuḇ ʾomer: ve-gam ʾani nattati lahem ḥuqqim lo ṭoḇim* 'Rabbi Yohanan said: Anyone who reads without a melody…, of him the Scripture says, "Do they think I gave them laws that were not good?"' (Babylonian Talmud Megilla 32a, quoting Ezek. 20.25). Rabbi Yohanan's criticism implies that the normative procedure, the procedure from which some Jews were deviating, was to chant the Bible.

The Jewish tradition of chanting the Bible in public predates the institution of the synagogue. In Deuteronomy Moses is instructed כִּתְבוּ לָכֶם אֶת־הַשִּׁירָה הַזֹּאת וְלַמְּדָהּ אֶת־בְּנֵי־יִשְׂרָאֵל שִׂימָה בְּפִיהֶם *kiṯḇū lāḵem ʾeṯ-haš-šīrâ haz-zōṯ wə-lammədāh ʾeṯ-bənē-yiśrāʾēl śīmāh bə-p̄īhem* 'write down this song and teach it to the people of Israel; put it in their mouths' (Deut. 31.19), and we read further וַיְדַבֵּר מֹשֶׁה בְּאָזְנֵי כָּל־קְהַל יִשְׂרָאֵל אֶת־דִּבְרֵי הַשִּׁירָה הַזֹּאת עַד תֻּמָּם *way-yḏabbēr mōše bə-ʾāznē kāl-qəhal yiśrāʾēl ʾeṯ-diḇrē haš-šīrâ haz-zōṯ ʿaḏ tummām* 'Then Moses recited the words of this song to the very end, in the hearing of the whole congregation of Israel' (Deut. 31.30). In the 7th century B.C.E. King Josiah 'read' the Bible in the presence of the assembled people: וַיַּעַל הַמֶּלֶךְ בֵּית־ה' וְכָל־אִישׁ יְהוּדָה וְכָל־יֹשְׁבֵי יְרוּשָׁלַ͏ִם אִתּוֹ וְהַכֹּהֲנִים וְהַנְּבִיאִים וְכָל־הָעָם לְמִקָּטֹן וְעַד־גָּדוֹל וַיִּקְרָא בְאָזְנֵיהֶם אֶת־כָּל־דִּבְרֵי סֵפֶר הַבְּרִית הַנִּמְצָא בְּבֵית ה' *way-yaʿal ham-meleḵ bēṯ-YHWH wə-ḵāl-ʾīš yəhūḏâ wə-ḵāl-yōšḇē yərūšālayim ʾittō wə-hak-kōhănīm wə-han-nəḇīʾīm wə-ḵāl-hāʿām lə-miq-qāṭōn wə-ʿaḏ-gāḏōl way-yiqrā ḇə-ʾāznēhem ʾeṯ-kāl-diḇrē sēp̄er hab-bərīṯ han-nimṣā bə-ḇēṯ YHWH* 'The king went up to the House of the LORD, together with all the men of Judah and all the inhabitants of Jerusalem, and the priests and prophets—all the people, young and old. And he read to them the entire text of the covenant scroll which had been found in the House of the LORD' (2 Kgs 23.2) (the Hebrew word וַיִּקְרָא *way-yiqrā* 'and he read' in this context likely refers to cantillation, rather than to reading without a melody). And in the 5th century B.C.E., shortly after the return of the Judean exiles from Babylon, וַיֵּאָסְפוּ כָל־הָעָם כְּאִישׁ אֶחָד אֶל־הָרְחוֹב אֲשֶׁר לִפְנֵי שַׁעַר־הַמָּיִם וַיֹּאמְרוּ לְעֶזְרָא הַסֹּפֵר לְהָבִיא אֶת־סֵפֶר תּוֹרַת מֹשֶׁה אֲשֶׁר־צִוָּה ה' אֶת־יִשְׂרָאֵל: וַיָּבִיא עֶזְרָא הַכֹּהֵן אֶת־הַתּוֹרָה לִפְנֵי הַקָּהָל מֵאִישׁ וְעַד־אִשָּׁה וְכֹל מֵבִין לִשְׁמֹעַ בְּיוֹם אֶחָד לַחֹדֶשׁ הַשְּׁבִיעִי: וַיִּקְרָא־בוֹ לִפְנֵי הָרְחוֹב אֲשֶׁר | לִפְנֵי שַׁעַר־הַמַּיִם מִן־הָאוֹר עַד־מַחֲצִית הַיּוֹם נֶגֶד הָאֲנָשִׁים וְהַנָּשִׁים וְהַמְבִינִים וְאָזְנֵי כָל־הָעָם אֶל־סֵפֶר הַתּוֹרָה: *way-yēʾāsp̄ū ḵāl-hā-ʿām kə-ʾīš ʾeḥāḏ ʾel-hā-rəḥōḇ ʾăšer lip̄nē šaʿar ham-māyim way-yōmrū lə-ʿezrā has-sōp̄ēr ləhāḇī ʾeṯ-sēp̄er tōraṯ mōše ʾăšer-ṣiwwā YHWH ʾeṯ-yiśrāʾēl: way-yāḇī ʿezrā hak-kōhēn ʾeṯ-hat-tōrā lip̄nē haq-qāhāl mē-ʾīš wə-ʿaḏ-ʾiššā wə-ḵōl mēḇīn lišmōaʿ bə-yōm ʾeḥāḏ la-ḥōḏeš haš-šəḇīʿī: way-yiqrā-ḇō lip̄nē hā-rəḥōḇ ʾăšer lip̄nē šaʿar ham-mayim min-hā-ʾōr ʿaḏ-maḥăṣīṯ hay-yōm neḡeḏ hā-ʾănāšīm wə-han-nāšīm wə-ham-məḇīnīm wə-ʾāznē ḵāl-hā-ʿām ʾel-sēp̄er hat-tōrā* 'The entire people assembled as one man in the square before the Water Gate, and they asked Ezra the scribe to bring the scroll of the Torah of Moses with which the LORD had charged Israel. On the first day of the seventh month, Ezra the priest brought the Torah before the congregation, men and women and all who could listen with understanding. He read from it, facing the square before the Water Gate, from first light until midday, to the men and the women and those who could understand; the ears of all the people were given to the scroll of the Torah' (Neh. 8.1–3).

Beginning in the Second Commonwealth, the Torah was read in the synagogue. The Mishna describes the synagogue service on the Day of Atonement: חַזָּן הַכְּנֶסֶת נוֹטֵל סֵפֶר תּוֹרָה וְנוֹתְנוֹ לְרֹאשׁ הַכְּנֶסֶת [וְרֹאשׁ הַכְּנֶסֶת] נוֹתְנוֹ לַסְּגָן וְהַסְּגָן נוֹתְנוֹ לְכֹהֵן גָּדוֹל וְכֹהֵן גָּדוֹל עוֹמֵד וּמְקַבֵּל וְקוֹרֵא עוֹמֵד וְקוֹרֵא אַחֲרֵי מוֹת וְאַךְ בֶּעָשׂוֹר *ḥazzan hak-keneset noṭel sēp̄er tora ve-notno le-roš hak-keneset [ve-roš ha-keneset] notno las-segen ve-has-segen notno le-ḵohen ve-ḵohen gadol ʿomed u-mqabbel ve-qore ʿomed ve-qore ʾaḥare mot ve-ʾaḵ be-ʿaśor* 'The synagogue attendant takes a torah-scroll and hands it to the synagogue president. The synagogue president hands it to the deputy [high priest] and he hands it to the high priest. The high priest stands, receives [the scroll] and reads [therein] "After the death…" and "Howbeit on the tenth day…"' (Mishna Soṭa 7.7, quoting Lev. 16.1 and 23.26–32). The New Testament describes the practice of reading the הפטרה *haṗṭara* 'a pericope from the Prophets' on a Sabbath: 'He [Jesus] went to Nazareth, where he had been brought up, and on the Sabbath day he went into the synagogue, as was his custom. And he stood up to read. The scroll of the prophet Isaiah was handed to him. Unroll-

 ISBN 978-90-04-17642-3

ing it, he found the place where it is written, "The Spirit of the Lord is on me, because he has anointed me to preach good news to the poor. He has sent me to proclaim freedom for the prisoners and recovery of sight for the blind, to release the oppressed, to proclaim the year of the Lord's favor". Then he rolled up the scroll, gave it back to the attendant and sat down' (Luke 4.16–21, quoting Isa. 61.1–2).

Several Jewish scholars in the middle ages attest to the practice of cantillation. The 10th century Tiberian Masorete Aharon ben-Asher described the musical characteristics of the various טעמים *ṭeʿamim*. For example, he described פזר *pazer* poetically as מגביה וחוזר ובלשון מתפזר *magbiah ve-ḥozer u-ḇal-lašon mitpazzer* 'It goes up and returns and is scattered with the tongue'. He summarizes his description of the טעמים *ṭeʿamim* ,זה כלל הטעמים ומשרתים נעימות מגולים ולא סתומים *ze kelal haṭ-teʿamim u-mšartim, neʿimot megullim ve-lo setumim* 'This is the principle of the *ṭeʿamim* and their conjunctives: the melodies are revealed and are not hidden' (ben-Asher, *Diqduqe haṭ-Ṭeʿamim* 1.15, 23).

In the 11th century, Solomon Iṣḥaqi (better known by his acronym, Rashi) described the practice of cantillation in his commentary on Babylonian Talmud Berakhot 62a "The cantillation of the Torah. This could refer to the notation [of the melodies] in the book or to the vocal inflection and the sound of the melodies for singing [the motifs] *pašṭa, darga, šofar mehuppaḵ*…".

Two rabbis from this era attributed a divine origin to the tradition of cantillation. Rabbi Simḥa ben Samuel of Vitry (d. 1105) wrote, "The melodies and phrasing of the cantillation signs are a tradition from Mount Sinai." (*Maḥzor Vitry* §120, p. 241). And Rabbi Yehudah He-Ḥasid (c. 1150–1217, Rhineland) wrote, The melodies were codified so that the Torah would not be chanted to the melody of the Prophets or the Writings,…rather each melody as it was established. For all this is the law [revealed by God] to Moses at Mount Sinai, as it says (Exod. 19.19) "God answered [Moses] with a voice". [Why is it written] "with a voice"? [Moses] transmitted to the Israelites the same melodies that he heard [from God]. (*Sefer Ḥasidim* §302, p. 241).

The 12th-century Rabbi Yehudah Ha-Levy described the unique function of music in cantillating the Biblical text. "The aim of language

Figure 1. European notation.

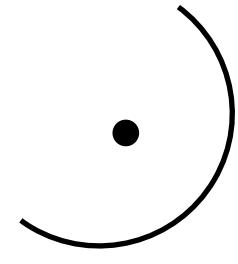

Figure 2. Tiberian Jewish notation.

is to transmit an idea from the heart of the speaker to the heart of the listener.… But you see in the poor remnant of our language which has been preserved in writing, a language created and instituted by God, are implanted subtle elements that serve to promote the complete understanding of the intent of the speaker.… These are the *ṭeʿamim* with which the holy text is read. They signify the places where the speaker intended to pause between two thoughts or the places where he intended to connect ideas together. They distinguish question from answer, subject from predicate, words spoken in haste from more deliberate speech, command from supplication" (*Sefer hak-Kuzari* part 2, §72).

Between the 8th and 10th centuries, the Masoretes of Tiberias codified and developed a system for notating the ancient cantillation melodies. The graphic signs (טעמים *ṭeʿamim*) which depict the cantillation melodies are a form of ekphonetic notation indicating inflection patterns and serving as a reminder of melodic motifs. The טעמים *ṭeʿamim* do not represent absolute pitches, as do the symbols of Western notation. The note depicted in figure 1 indicates the pitch a' (the sound produced by a string vibrating at the rate of 440 cycles per second), lasting .25 seconds, at a moderately soft level of volume.

By way of contrast, the cantillation sign תְּבִיר *teḇir* depicted in figure 2 is ambiguous.

 ISBN 978-90-04-17642-3

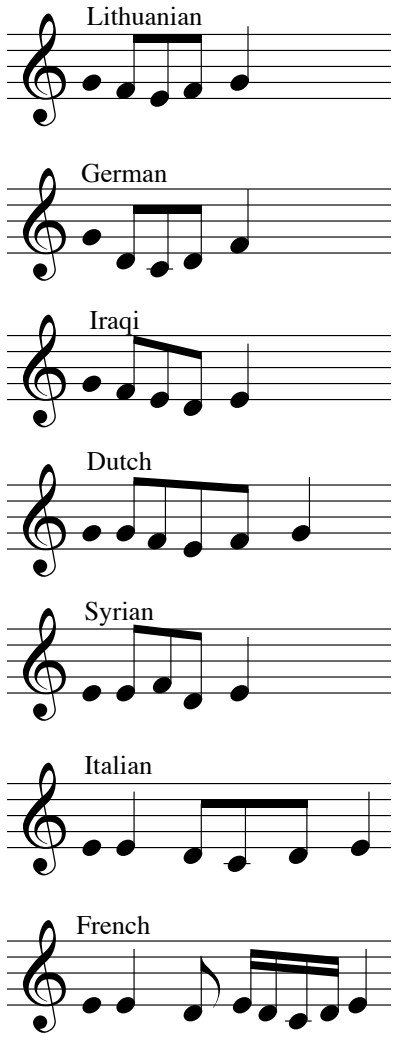

Figure 3. *Teḇir* as interpreted in seven different Jewish traditions (after Idelsohn).

It represents not one fixed pitch, but rather a motif, a cluster of notes, the exact identity of which will vary depending on the text to which it is attached, the liturgical occasion on which it is sung, and the background and temperament of the individual who sings it. Each Jewish community has its own unique melodic tradition. Figure 3 indicates some of the ways in which the symbol תְּבִיר *teḇir* might be interpreted by Jews of seven different communities, when it is attached to a word from the Torah as chanted on a normal Sabbath. Of course, any attempt to represent cantillation motifs in Western notation will be somewhat misleading. The rhythms are more subtle than can be depicted, and the pitches of the motif could be sung in any key that is comfortable for the performer.

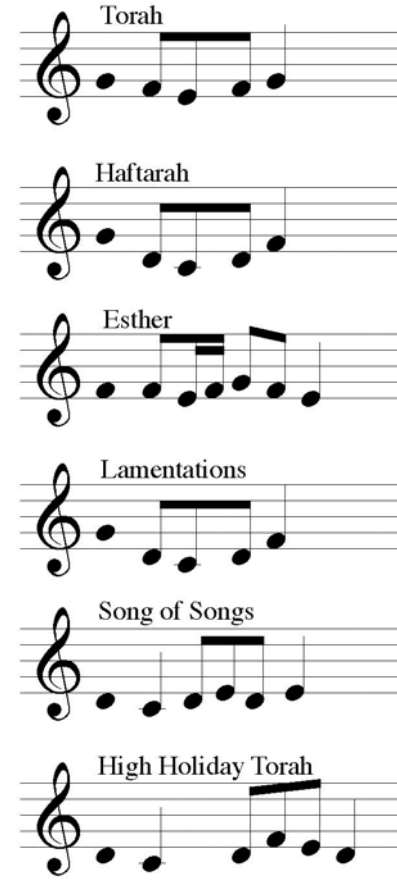

Figure 4. תְּבִיר *teḇir* as interpreted in six different liturgical contexts.

Even within a single Jewish musical tradition, the interpretation of the same טעם *ṭaʿam* is dependent on the text that is being read and the liturgical occasion. Figure 4 depicts the sound of תְּבִיר *teḇir* in a Lithuanian community for the reading of (a) the Torah on a normal Sabbath (or Festival or weekday), (b) the Hafṭarah (Prophetic lesson) on a normal Sabbath or festival, (c) the book of Esther on the festival of Purim, (d) the book of Lamentations on the Ninth of Av, (e) the Song of Songs on Passover (the same melody is used for the Book of Ruth on Shavuʿot and the Book of Ecclesiastes on Sukkot), and (f) the Torah reading at the morning service on Rosh Hashanah and Yom Kippur.

The music of cantillation is *logogenic*, that is, its rhythm is determined by the natural cadences of speech. Its flow is quite flexible; there is no sensation of a regular meter. When cantillating a Biblical text, the words are considered the most important element—the words are "the master of the music," to borrow a phrase

from the Italian madrigalists. In the early 17th century, the Italian Rabbi Samuel Archivolti described cantillation as "a melody which is composed to fit the words in consideration of their ideas" (Adler 1975:100). However, few practitioners of the art of cantillation are sensitive to the subtle nuances of rhythm implied in the hierarchy of the syllables and the words. In the recitative style of cantillation, some syllables are longer and others are shorter. The shortest note is the chanting of a 'quick' syllable—an unaccented syllable containing either a vocalic *shewa* or a *ḥaṭef* vowel. An unaccented syllable containing a full vowel is short, but slightly longer than a 'quick' syllable. A syllable marked with a געיה *gaʿya* (also known as מתג *meteg*) or other secondary accent will be slightly longer, and a syllable marked with a primary טעם *ṭaʿam* is the longest.

Individual words are also subject to a variety of rhythmic interpretations. The quickest word is one which has lost its independence, having been attached to another word with *maqqef* (a hyphen-like symbol); it is treated as if it were entirely composed of unaccented syllables (→ Clitics: Pre-Modern Hebrew). A word bearing a conjunctive accent will be chanted more quickly than the disjunctive word which follows it. A word bearing a disjunctive accent will be performed with a slight *ritardando* and/or will be followed by a slight pause. Furthermore, disjunctive accents are hierarchical. The lowest level טעמים *ṭeʿamim* (level-four) are chanted without any pause or deceleration—פָּזֵר *pazer*, פָּזֵר־גָּדוֹל *pazer gadol*, תְּלִישָׁה־גְּדוֹלָה *teliša gedola*, גֵּרֶשׁ *gereš*, גְּרֵשַׁיִם *geršayim*, לְגַרְמֵהּ *legarmeh*). Level-three טעמים *ṭeʿamim* have a slightly greater pausal function—רְבִיעַ *reḇiaʿ*, זַרְקָא *zarqa*, פַּשְׁטָא *pašṭa*, יֶתִיב *yetiḇ*, תְּבִיר *teḇir*. Level-two טעמים *ṭeʿamim* are a bit stronger—זָקֵף־גָּדוֹל *zaqep-gadol*, סֶגוֹל *segol*, שַׁלְשֶׁלֶת *šalšelet*, זָקֵף *zaqep*, טִפְּחָא *tippeḥa*. And level-one טעמים *ṭeʿamim* have the greatest disjunctive function—אֶתְנַחְתָּא *ʾetnaḥta* and סִלּוּק *silluq*). While level-four טעמים *ṭeʿamim* have more elaborate (melismatic) musical content, appropriate for the beginnings of phrases, level-one טעמים *ṭeʿamim*, used for ending longer clauses and sentences, are melodically simpler and weightier.

The tempo of the weekday-morning Torah cantillation is generally rather fast. This is a short service, and most worshippers are eager to finish on time so that they can get to work. On the Sabbath, the service is more extended and its participants (in theory, at least) have allocated more time to the liturgy. The Sabbath cantillation need not be rushed. The service of the High Holy Days is the most extended and most solemn of all. The Torah reading on these mornings is slow and dramatic. In all cases, however, the proper rhythmic relationships among the טעמים *ṭeʿamim* is maintained.

Some musicologists speculate that in ancient Israel there may have been one generally accepted method of chanting the טעמים *ṭeʿamim* (Idelsohn 1929:71). When Jews settled in lands outside of their native land they attempted to preserve the traditional cantillation melodies and guard them from change. But, inevitably, their music was influenced by the sounds of the surrounding majority culture. Still, a glance at Figure 3 reveals that each of the variants has a similar contour, indicating the likelihood of a common origin.

We don't know what the original melodies were for the טעמים *ṭeʿamim*. But we are reasonably sure that throughout the years of the Diaspora these melodies evolved and mutated as they were passed on orally from one singer to the next. Inevitably, the chanting of the טעמים *ṭeʿamim* became tinted by the alien colors of non-Jewish music. The cantillation motifs sung by German Jews began to sound different from those sung by Syrian Jews. Furthermore, even within a community, each individual would personalize the טעמים *ṭeʿamim*. No two Jews chanted the Bible in exactly the same way.

There are many musical traditions for chanting the טעמים *ṭeʿamim*. Subtle melodic changes are accepted in most communities, as are legitimate traditional cultural variations. But two elements have not changed in the past millennium and are common to all traditions: the primacy of the text and the Tiberian or 'Masoretic' system of punctuation. Tradition-bound Jews across the world accept the authenticity of טעמי המקרא *ṭaʿame ham-miqra* as they were codified in Tiberias by ben-Asher more than a thousand years ago. These graphemata appear in the printed Bibles of all Jews, from Yemen to Germany, from Morocco to England, from France to Israel, from Lithuania to Iraq. Every Jewish community has some tradition of interpreting these טעמים *ṭeʿamim* musically.

The first known transcription of the טעמים *ṭeʿamim* into Western notation was made in

 ISBN 978-90-04-17642-3

Figure 5. Transcription of the טעמים *ṭeʿamim* from Reuchlin, 1518.

the early 16th century by the Christian Bible scholar, Caspar Amman (ca. 1460–1524). The European Renaissance had fostered an intellectual climate in which religious tenets were being reexamined and reformed and ancient sources were being scientifically analyzed. Many Christian scholars suspected that the mystical view of Scripture, the official dogma of the Catholic Church, was obscuring historical reality. These humanists wanted to examine critically the primary sources of the Bible for clues to a more scholarly understanding of ancient Israel, an understanding unclouded by the force of any one interpretation.

Caspar Amman was one of the first Christian humanists to grasp the importance of the טעמים *ṭeʿamim* for the understanding of Biblical Hebrew. His Hebrew grammar, never published, contained a transcription into Western notation of the melodies of the טעמים *ṭeʿamim*. Amman's source for the notation was Johannes Boeschenstein (1472–1540), who supplied the same information for the best known of the Christian Hebrew grammars of this period, Johannes Reuchlin's *De accentibus et orthographia linguae Hebraicae* 'On the Accent and Orthography of the Hebrew Language', published in Hagenau in 1518.

Several other Christian theologians of this period published transcriptions of the טעמים *ṭeʿamim*, but all of these works were theoretical and seem to have gone largely unnoticed. We have no evidence of a major movement among Christians to chant the Bible using the טעמים *ṭeʿamim*. Jews did not read Latin textbooks, but rather continued to transmit their melodies orally. It would be another three centuries before there were further attempts to notate the טעמים *ṭeʿamim*.

After the emancipation, when a significant number of Jews had become conversant with Western notation, there was a new interest in transcribing the traditional melodies. But this time it was Jews publishing them for use by Jews. Many cantors were eager to avail themselves of the Western notational system as

a modern and efficient means of teaching the liturgical chants to their students. Among the first to publish the טעמים *ṭeʿamim* in Western notation were Isaac Nathan (London, 1823), Samuel Naumbourg (Paris, 1847), Salomon Sulzer (Vienna, 1865), Abraham Baer (Göteborg, Sweden, 1877) and Israel M. Japhet (Frankfurt am Main, 1896).

In the 20th century the study of the טעמים *ṭeʿamim* took a more scholarly turn. Abraham Zvi Idelsohn, the pioneering Jewish ethnomusicologist, collected melodies for the טעמים *ṭeʿamim* from Jewish informants in a broad geographical sampling throughout Europe, North Africa, and Western Asia. He published his transcriptions in his monumental *Thesaurus of Jewish Oriental Melodies* and analyzed them in comparative tables in his *Jewish Music in Its Historical Development*. Johanna Spector, Robert Lachmann, and other researchers expanded the collection begun by Idelsohn. The Israeli musicologist Hanoch Avenary did a thorough analysis and comparison of available printed sources in his *The Ashkenazi Tradition of Biblical Chant between 1500 and 1900*. In his book, *The Sacred Bridge*, Eric Werner focused his study on the similarities between Jewish and Christian cantillation traditions.

In all Jewish traditions of Biblical chant, clarity and expressivity of the text is paramount. The melody constitutes a stylization of the natural inflections of expressive speech, in which some syllables in the words and some words in the text are emphasized more than others. There is also an aesthetic element; cantillation is a beautification of the text, a הדור מצוה *hiddur miṣva* 'enhancement of the commandment'. From a practical point of view, chanting is a stage device, a means of projecting the voice so that all worshippers in a large congregation would be able to hear the text. Chanting is also a mnemonic device, a means to help the reader memorize the text. From a liturgical point of view, chanting creates a border between sacred reading and secular reading. Chanting, rather than reading, allows the community to create a marker of a holy day. For example, on Rosh Hashanah Ashkenazic Jews use a special melody for reading the story of Abraham's binding of Isaac, but when that same story is read on Shabbat a month later, the regular melody is used. The chant thus serves as another symbol of the holy day, along with visual symbols, such as white curtains and vestments. In all cases, the music serves the sacred text. A traditional Jew would not conceive of singing the melodies of cantillation without their text, any more than he would conceive of performing the text without the appropriate melodies of cantillation.

Biblical Accents: Musical Dimension

Contemporary traditions of biblical cantillation are based on the Tiberian accent system. Every Jewish community has unique traditions that include different tunes for chanting the Pentateuch, the Prophets, and the Five-Scrolls (Song of Solomon, Ruth, Ecclesiastes, Lamentations and Esther). Some Jewish groups also have special tunes for the biblical portions read on certain festivals (i.e., the High Holidays). In the Tiberian Masoretic text the books of Job, Proverbs, and Psalms have signs of accents different from the rest of the Bible. A number of Psalms are an integral part of the prayers, and are chanted by various communities according to traditional tunes that have no connection with the accent system. Even in those cases where Psalms (and the book of Job, in certain communities) are performed as independent pieces, their traditional tunes have no connection with the accentuation system. This fact might be the result of the old edict that prohibited reading Psalms outside the Temple (Eldar 1994:34).

The cantillation tradition of every community is based largely on the specific musical tradition of that community, which in turn is naturally affected by contact with the surrounding non-Jewish cultures. Therefore, the first step in the classification of the various biblical chants is to map the relevant traditions according to their actual geographic extent. Thus we find the German-Jewish tradition spreading west to Denmark and England, and also to Eastern Europe as a 'Slavic' variation; the Spanish-Portuguese-Jewish tradition spread to Amsterdam and eastwards to Northern Greece and Turkey; the Italian-Jewish tradition has a 'Greek' variation; the Iranian-Jewish tradition has an 'Afganistani' variation; the Iraqi-Jewish tradition has Syrian, Egyptian, and Tunisian variations; the Moroccan tradition has Algerian and Libyan variations; and the Yemenite-Sanʿani tradition has Huggariya (= Sharʿab) and ʿAdani variations. Furthermore, within each of the above traditions, there are also numerous local styles (that evolved wherever organized Jewish communities existed over an extended period of time). Today, however, as a result of World-War II, as well as the establishment of the State of Israel and the general improvement in communication, this musical richness
